-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 15 October 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 8 to 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kashiwara in view of Anada.

The teachings of Kashiwara and Anada and how these references in combination render obvious the instant claims was noted in previous office actions. As such this will not be repeated. In an effort to overcome the rejection, applicants have limited the composition in claim 8 to the two different polyacetal resins, a glass inorganic filler and a stabilizer. Applicants use "consisting of" language. This is not sufficient to overcome obviousness of these claims.

Upon reviewing the newly amended claims, the Examiner questioned what was embraced by the stabilizer component (C). Upon a review of prior art, it was noted that polyurethanes have been used as "stabilizers" for polyacetal resins. Since the polyurethane in Kashiwara can be considered a stabilizer, this meets claimed component (C) and applicants' position that claim 8 specifically excludes polyurethane from the composition of the present invention is not persuasive.

To support the Examiner's position that polyurethane can be considered a stabilizer note the teachings of Dolce et al. and Wagman.

3. Tanimura et al. is cited as being of general interest. This reference teaches a blend of polyacetal resins but fails to teach or suggest a specific hydroxyl group content for each resin.
